BUSINESS INTELLIGENCE / SYNTHETIC TEST

Weekly Business Intelligence — SYNTHETIC QA PREVIEW

Khyati Precious Gems Private Limited

2026-10-19 – 2026-10-25 · Asia/Kolkata
Generated 26 Oct 2026, 12:01 am (Asia/Kolkata) · Data coverage: PARTIAL

Executive summary

In-stock physical SKUs	Distinct marketplace order records	Eligible item units
1	Unavailable	Unavailable

Confirmed new listings (partial)	Incomplete physical SKUs	Critical / warning alerts
1	1	0 / 3

Recorded marketplace order value: **Unavailable — order sync incomplete**. Net sales, settlements and consolidated INR: unavailable.

Week-over-week: orders N/A — order sync incomplete, units N/A — order sync incomplete, confirmed new listings N/A. Revenue change is unavailable unless order sync coverage is complete.

WARNING: 100.0% of the current inventory snapshot is incomplete.
Resolve the SKU exception register.

WARNING: Shop: marketplace connection is disconnected.
Reconnect or synchronize listings before relying on active-listing snapshots.

WARNING: Shop: the shop is disconnected; order metrics for this period are unavailable.
Run a successful complete order sync after the reporting period ends.

Inventory overview — generation-time snapshot

1 unique physical SKUs. 1 distinct physical SKUs have ERP sale records during the period. This separate ledger is not added to marketplace quantities.

Status	Physical SKUs
IN_STOCK	1

Gemstone	Physical SKUs	Gemstone	Physical SKUs
Ruby	1		

In-stock cost valuation: 10; asking-price valuation: 20. INR (existing inventory cost/selling-price convention). One value per physical SKU; neither is realized revenue.

Marketplace and shop performance

Order changes compare this reporting week with the previous week and require complete order sync coverage. Percentage is N/A when the previous week was zero. Inventory/listing counts are current snapshots.

> Unavailable: a complete successful order sync after 2026-10-25 (Asia/Kolkata) is missing for Shop. Stored records are not evidence of zero demand.

Shop / platform	Connection	Active listings now	New publications	Orders / units	Recorded order value	Change vs previous week
Shop / EBAY	Disconnected	1	1	Unavailable	Unavailable	N/A · order sync incomplete

Synchronization health

Timestamps use Asia/Kolkata. Listing sync status supports the active-listing snapshot. Order metrics require a complete successful order sync after the reporting period ended.

Shop	Last listing sync	Last order sync	Order data for period	Failed sync logs	Listing errors now
Shop	No sync recorded	No sync recorded	Disconnected	0	0

Stock availability and sold inventory

Current in-stock physical SKUs: 1. Distinct physical SKUs with ERP sales in the reporting period: 1. Reserved and inactive categories use the recorded stock statuses; historical availability is unavailable.

Orders received

Unavailable: a complete successful order sync after 2026-10-25 (Asia/Kolkata) is missing for Shop. Stored records are not evidence of zero demand. Counts, units and value are suppressed until order synchronization is complete for every shop in scope.

Revenue and financial coverage

Recorded marketplace order value by original currency: Unavailable — order sync incomplete.

Average eligible recorded order value (per currency): Unavailable — order sync incomplete. Gross sales, net sales, tax, shipping, discount and refund amounts cannot be reliably separated. Cash receipts, settlements and historical currency conversion are unavailable.

Currency	Current order value	Previous	Change
USD	Unavailable	Unavailable	N/A — incomplete sync
INR	Unavailable	Unavailable	N/A — incomplete sync

Historical comparisons

Metric	This week	Last week	Change
Orders	Unavailable	Unavailable	N/A — incomplete sync
Units	Unavailable	Unavailable	N/A — incomplete sync
Confirmed new listings	1	0	N/A

Returns and cancellations

Marketplace cancellation/refund counts are unavailable because order sync coverage is incomplete. Comprehensive marketplace cancellation/refund counts are unavailable. ERP returns (separate ledger): 1 records / 2 units. Financial refund value is unavailable.

Confirmed new marketplace listings

Coverage is partial: only verified successful ERP eBay publication markers. Failed attempts and imported listing creation dates are excluded.

Shop / platform	SKU	Title	Listing ID	Published (UTC)
Shop	KG-1	Ruby	external-listing	2026-10-18T18:30:00.000Z

Inventory completeness

1 of 1 physical SKUs incomplete (100.0%). Certificate completeness follows the separate Inventory Missing Certification filter.

Missing field	Affected SKUs
Image	1

Missing images

1 current physical SKUs have no populated image URL or media reference (100.0% of physical inventory). Video-only media does not satisfy image completeness; remote URL availability is not probed.

Certificate completeness

No eligible SKUs were found. Inventory's Missing Certification filter counts only in-stock items with an image URL or media record. The report checks the saved certificateNo and certificateNumber fields; empty-string or null values count as missing. Attached certificate-document availability is not assessed.

Missing required product fields

Required field	Affected SKUs
No covered records in this period.	

History and operational charts

Marketplace order charts unavailable

Unavailable: a complete successful order sync after 2026-10-25 (Asia/Kolkata) is missing for Shop. Stored records are not evidence of zero demand.

Complete versus incomplete physical SKUs

Missing-field breakdown

Action items

WARNING · 100.0% of the current inventory snapshot is incomplete.
Resolve the SKU exception register.

WARNING · Shop: marketplace connection is disconnected.
Reconnect or synchronize listings before relying on active-listing snapshots.

WARNING · Shop: the shop is disconnected; order metrics for this period are unavailable.
Run a successful complete order sync after the reporting period ends.

Data coverage and calculation notes

- SYNTHETIC TEST DATA — layout and calculation validation only. These are not live company statistics.
- 1 shops are disconnected, have stale listing synchronization or have no successful listing synchronization. Active-listing snapshots may be out of date.
- Order data is incomplete: a complete successful order sync after the reporting period ended 2026-10-25 (Asia/Kolkata) is missing for Shop (disconnected). Order counts, units, recorded value, zero-order alerts and order/revenue comparisons are unavailable; stored rows must not be read as zero demand.
- Inventory completeness, availability, valuation and active listings are generation-time snapshots. Historical week-end inventory and prior-week completeness are unavailable. Image completeness checks for a populated image URL/media reference; remote asset reachability is not probed.
- New listings cover confirmed ERP eBay publications only; imported creation dates and Etsy draft dates are not publication evidence. Historical failed publication-attempt counts are unavailable.
- Cancellation/refund/unpaid exclusions recognize recorded status strings only. Order-record counts include marketplace rows with recorded cancellation/refund statuses; eligible unit/value totals exclude known cancelled/refunded/failed/unpaid/payment-pending statuses. The eBay connector stores fulfillment status rather than a verified payment/refund ledger; comprehensive cancellation/refund counts and payment confirmation are unavailable. Marketplace amounts are recorded order totals, may include shipping/tax, and are not cash receipts, settlements or net profit. Refund, tax, discount and shipping amounts cannot be reliably separated. Net sales and consolidated historical INR are unavailable.
- Physical SKU counts, marketplace listing counts, order counts and item quantities are distinct measures. ERP sales/returns are separate ledgers and are not added to marketplace revenue.
- Intervals are inclusive at start and exclusive at end. Orders use source orderDate, sales use saleDate, publications use workPublication.publishedAt; inventory reflects generation time. Percentage changes are N/A when the prior value is zero.
